

# FaroArm Accessories

## FaroArm Tripod Mount

- Tripod Auxiliary Mounting Plate for complete portability
- Quick and flexible mount of the FaroArm
- Flexible laptop mount
- Removable calibration mount for hard probe and laser calibration
- Provides mount for other laser scanning hardware

### Features

Designed specifically for the Laser Design SLP Interface Kit with FaroArm. The tripod mount stabilizes and secures the measurement arm while offering maximum flexibility. The stand allows for a rigid setup process to provide the best system calibration, which ensures the best system performance. The calibration bridge can then be removed, providing easy access to the object to be digitized.
